

snoozies!®
Himalayan Yeti
 FAUX FUR SLIPPER

High in the Himalayan Mountains, near Nepal and Tibet, lives a legendary creature known as the Yeti. Standing an impressive 6 to 8 feet tall, the Yeti thrives in the world's coldest climates. The Yeti's fur is famed for exceptional warmth and a striking, unmistakable look.

In late winter 2025, snoozies!® ventured into this remote region in search of inspiration from this elusive legend and its famously cozy fur. The result of that journey is snoozies!® new **HIMALAYAN YETI FAUX FUR SLIPPER**.

These rare and ultra warm slippers were quietly previewed to a select group of gift retailers at the January 2026 Atlanta Gift Show, where they quickly captured attention. Crafted with our exclusive vegan-friendly snoozies!® synthetic Yeti fur, this standout style was an instant hit among retailers fortunate enough to preview the samples.

With the legend of the Yeti growing and the supply of rare Yeti-inspired fur limited, snoozies!® has secured a special allotment to produce a **limited quantity for Fall 2026 shipping**. Review the details here to see how you can be among the select retailers to offer this extraordinary style in your store!

Please note: No living yetis were harmed in the creation of this unique synthetic fur. The material is entirely vegan and ethically produced—no mythical creatures required!
