

SIoux CLEAN™ WATER TREATMENT

Complete Hardness Control

SIoux CLEAN™

Did you know that even 1/8" of scale build up can lead to a 22% increase in energy costs? Sioux Clean™ 1100 water treatment chemical is effective for complete hardness control as well as an iron sequesterant for industrial water heaters. Sioux Clean™ 101 water treatment is an effective sequesterant for high temperature applications such as low-pressure steam generators. This product is a liquid concentrate of exceptional purity, clarity, and stability.

BENEFITS

- Controls iron to prevent plugging.
- Prevents calcium scale deposits that would result in reduced flow and increased energy usage.
- Proactive method to minimize scale buildup and plugging.
- Saves money by reducing the need to clean mineral buildup and scaling that result in the plugging of equipment.

Sioux Clean™ 1100 for Water Heaters

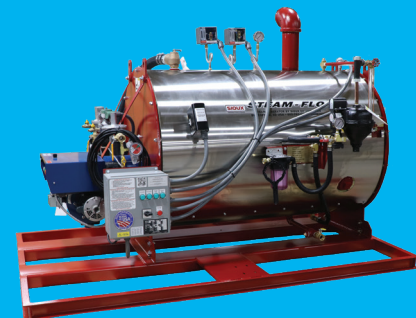

Part Numbers:

AC01489 Sioux Clean™ 1100 - 55 Gallon Drum

*Consult factory for proper dosage rates.

PM01633 Chemical Metering Pump**

** Required for Injection

Sioux Clean™ 101 for Steam Generators

Part Numbers:

AC01492 Sioux Clean™ 101 - 5 Gallon Container

*Consult factory for proper dosage rates.

PM01633 Chemical Metering Pump**

SA25647 Flow Switch Assembly**

**Required for injection
